***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: The prior art fails to teach or suggest a medical ointment or patch that contains 5% to 25% of a combination of dihydromethysticin, dihydrokawain and kawain. The prior art of record (Schutt) teaches an ointment composition that contains Kava Kava extract that contains the 3 kavalactones recited in the instant claims. The reference teaches that any combination of the 3 kavalactones would only be present in amount up to 0.4% of the ointment composition. Further, the art cited in this allowance (Alternative Medicine Review article) teaches that 4 particular kavalactones (the 3 listed above and in the instant claims as well as methysticin) are important for their beneficial effects and can be administered in amounts of 150-210 mg/kg daily. This amount is higher than the instant invention recites. Therefore, the prior art teaches amounts of the kavalactones that are below and above the recited concentration range but not the same or overlapping range as the instant claims. The instant claims are deemed allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
